Anderson

Dr. Engelmann,

Dear Sir,

I have just rec'd. a lot of Yucca seeds from my friend Dr. Hays of San Luis Obispo. I have no information from him as to the leaf or fruit nor them what you see. The capsule being dry seems to indicate Whipplei. However, you may be able to tell from the seeds I send you. If not too much trouble please let me know whether these are the kind of seeds wanted. Shall always be happy to get any seeds or specimens you may wish and that may be in my power to obtain

Yours Truly C. L. Anderson

Dr. Engelman,

My Dear Sir,

Your very welcome letter of six months ago should have been acknowledged ere this. I deserve to be stricken from your list of correspondents. I am very happy to learn of your success in studying Yuccas and Arcenthobia. I wish I could aid you. I was over at Monterey this summer when the Pinus insignis is very abundant and also the Arcenthobium growing on it - but I had no time to do much. I mentioned the matter to Dr. Canfield there and he said he knew what you desired in the way of observations and would try to aid you. We have none near here except on the oak. Bolander is entirely taken up with his official duties at present. I have not seen your paper on Yucci of N. Amer. should be happy to see it. - Prof Gray visited me at Santa Cruz and we went into the Sequoia groves together.

I send you a few specimens I collected at Monterey which I made into a package at the time I visited there but had hopes of adding something. I suppose however you have all the specimens you desire. These were collected Aug. 27th 1872. Mostly from one tree (Pinus insignis)

Enclosed I send you my photographs. They take

me it give more age than I am entitled to. Per=
haps when I look younger I will send another.

Would it be asking too much for you to send me
your photograph? I am trying to form a little
gallery of botanists.

With kindest regards Re=
main Truly Yours &c

C. L. Anderson
